## *Pullout Kitchen Faucet*

Today's kitchen is a place of high style, and today's kitchen faucet is designed to match. From the sleek functionality of chef-inspired faucets to the nostalgia of traditional reproductions, we can provide you with a faucet to accommodate individual style preferences and match your lifestyle.

*Not all kitchen pullout faucets are created equal!  
Some of the features that make for an ideal kitchen faucet are:*

- Beautiful design and easy to operate
- Optimal spout reach and height to provide great clearance beneath the spout
- Spray control that switches between regular flow & spray
- Spout that rotates 360 degrees
- Retractable hose
- Premium material construction for durability and reliability
- Ceramic disc valves that exceed industry longevity standards

*Some pullout faucets also offer other great features such as:*

- Variety of finishes that resist corrosion and tarnishing
- High temperature limit that sets a comfortable maximum temperature to eliminate scalding
- Anti-lime system that resists mineral buildup and is easy to clean and maintain
- Flow rates ranging from 2.5gpm for busy kitchens, to 1.5gpm for the Eco-conscious consumer

*Let us help you find the right pullout faucet for your kitchen,
