Safety & Comfort Comfort-Height Toilet

Did you know that over the course of a lifetime, the average person spends more than a year and a half in the bathroom?

Based on this fact, shouldn't it be a priority to create a comfortable environment in this room?

Comfort height toilets offer convenient, chair-height seating for people of all ages and statures, and comply with the height requirements of the *Americans with Disabilities Act (ADA)*.

The tank of a comfort-height toilet is usually the same as a conventional toilet's, however, the height of a comfort-height

toilet bowl (with seat) is 1-1/2" to 2" taller than the standard bowl, providing maximum comfort when standing up or sitting down.

Lunt Marymor's preferred field-tested eco-friendly toilet is also available in comfort-height. The *Eco-Drake ADA* (pictured above) is eligible for \$150 rebate from EBMUD, when you replace a high-flow water closet*.
