

Field-Tested Green Plumbing Solutions

"Turn your shower on... Water will flow from the Evolved showerhead until it senses that the water is hot; then, it will dial itself down to a trickle. Go ahead, finish brushing your teeth, making your bed, ironing your shirt, or feeding the dog! Reach into the shower, reset the small lever on the head, and your full body spray is standing by, steamy and hot, just the way you like it, and you saved all of that extra hot water otherwise lost during stand-by time from going down the drain. How cool is that?"

Features: 1.59gpm

ShowerStart™ Technology

Pressure Compensating Technology

Full Face Spray Pattern

Solid Brass Fittings

Attractive Design with Chrome Finish
